TAKE IT... EASYSNAP
ONE HAND OPENING MONODOSE SACHET
A TRUE NOVELTY IN THE WORLD OF MONODOSE SACHETS

An innovative packaging, smart and universal, which can make us save time, space and energy!

EASYSNAP is an absolute novelty which can replace all the 3 or 4-side seal monodose flexible sachets in the market. It can contain from 2 to 30 ml liquid or semi-dense product. With its one hand opening system, EASYSNAP is suitable to open and dispense in a clean way any liquid product.

Its flexibility makes Easysnap sachet able to replace also any conventional small monodose tubes, small bottles and thermoformed cups (see pictures).

After years of extensive marketing and packaging researches, Easypack Solutions has created EASYSNAP, a monodose sachet, with a patented opening system, unique in the world.

Up until today, we used to open a monodose sachet with two hands, however it was often not sufficient and we had to help ourselves with our own teeth! And, once opened, the sachet might have spilled its contents, in an unpredictable way, soiling our hands and clothes.

From now on, everything will change! We just have to take a monodose EASYSNAP with one hand and fold it with two fingers, in order to create a micro-rupture which expands progressively, according to the exercised pressure, and allows product to flow out progressively and completely.

A NEW MARKETING TOOL!
The monodose EASYSNAP can represent a perfect promotional tool for your product. Our technology allows you to work with a monodose sachet, with no air inside and consequently with a long shelf-life, with an undoubtedly unique appeal and a versatility never seen before. It is possible to carry EASYSNAP sachets every day in the purse, pocket or backpack. Unless the sachet is folded over 90°, it will not open, therefore resistant to any squeezing or crushing.

Moreover, EASYSNAP can be sold singularly or in handy and catchy pouches or packs, with single sachets stacked and ordered, exactly as in a blister pack.
EASYSNAP ADVANTAGES

Here’s a list of advantages which EASYSNAP monodose has, against any other traditional monodose container (4 side-seal sachets, 3 side-seal sticks, thermoformed cups, small bottles, tubes, etc.):

- One hand opening and no need of teeth!
- Innovative packaging design, with possibility of customization (in order to avoid any counterfeiting, as the monodose is patented, new and difficult to be reproduced).
- Product flows out only when sachet is folded over 90 degrees.
- Very low material cost.
- Neat, clean and hygienic opening.
- Barrier properties remain 100% undamaged, in order to assure a shelf-life up to 2 years.
- It opens a frontier to new opportunities and new products to pack, as well as to new marketing strategies.
- The sachet has a smart and ergonomic look. It is considered as a “friendly pack”.
- It has no air inside (the only possible air is the one contained in the product itself), consequently it has a much longer shelf-life than any other monodose containers.
- The sachet has obtained the Oscar of Packaging 2008, the Worldstar Packaging Award 2009, the Flexible Packaging Award Usa 2012 and the Packaging for Vending Machines Award 2012 for its innovative design and its unique concept to be freely and individually (one by one) dispensed from a vending machine, due to its semi-rigid structure.

EASYSNAP can replace any conventional monodose sachet, including small cups, small bottles and tubes with content from 2 to 30 ml.

85x100 mm  18 / 30 ml
75x100 mm  12 / 20 ml
60x100 mm  8 / 12 ml
50x80 mm   6 / 8 ml
40x80 mm   2 / 5 ml
40x50 mm   1,2 / 2,5 ml

THE APPLICATION FIELDS ARE NUMEROUS!
It can replace any conventional sachet in food industry, pharmaceuticals, cosmetic and chemicals.

You can try it with ketchup, mayonnaise, salad dressing, jam, melted cheese, mustard, spirits, syrups, honey, liquid medications, baby-care products, ointments, toothpaste, shampoo, hair conditioner, liquid hand-sanitizer, body lotions, creams, foam bath, moisturizers, sun creams, liquid detergents, promotional dispenser, etc.

OUR MACHINES AND EASYSNAP SACHETS ARE PATENTED WORLDWIDE.
They can satisfy both promotional orders and industrial productions. They are equipped with advanced technologies and they can guarantee reliable performances.
The first monodose with one hand facilitated opening!
